

January 19, 2018

To Whom It May Concern,

The more informed my wife and I are of the Smart Meters, the more determined we are to stand our ground on the opposition of Smart Meters!

My wife and I bought our home in September 1977, and the antolog meter came with our home. The Antolog Meter, along with everything else, is under the grandfather clause when a home is purchased.

In Feburary 2016, we were notified by DTE to change to the Smart Meter. We added our locks beside their locks to our casing.

In September 2017, we recieved a letter from DTE stating that we would be disconnected on or after September 18, 2017, if we did not agree to change to a Smart Meter. On September 19, 2017, DTE cut our power at the utility pole.

In January 2018, DTE trespassed onto my property even though we have not been their customer since September 19, 2017. They cut our locks along with thier locks on my casing and put their Smart Meters on.

We refuse to be a customer of DTE!

I am one out of thousands of people that have been bullied, threatened, and/or disconnected by DTE.

I hope you have the compassion to question the monoploy of DTE and their control they have over their customers' lives. An example is, I use a C-Pack machine at night and have not been able to use it since September 19, 2017.

Thank you for your time!

Sincerely,
Mr. and Mrs. Traver
